

# PhD in Communication Sciences & Disorders

## Where Science Meets Practice.

The PhD program in Communication Sciences and Disorders (CSD) is unique in the breadth and depth of research opportunities and course offerings it provides in hearing, speech, language, learning, and swallowing.

The program is designed to prepare graduates for careers in academia, clinical science, and industry.

Located in Evanston/Chicago, Illinois

No GRE Scores Required for Application

## What students love about the program:

- Rich **research** experiences with **mentorship** from leaders in the field
- Strong **interdisciplinary** collaborations across the university
- Three foundational **courses** for the 1<sup>st</sup> year cohort, then flexible options
- Opportunities to lead and contribute to **publications** and grants
- Options for **clinical** exposure or formal training including PhD CCC-SLP track
- 5 full years of **support**: generous monthly stipend plus coverage of 100% of tuition and health insurance

Many faculty are accepting new students, including **these new faculty**

**Tracy Conner,**  
PhD CCC-SLP:  
Addresses issues of linguistic (in)justice and (in)equity using linguistics and psychological methods

**Marisha Speights Atkins,** PhD CCC-SLP:  
Uses acoustic-based methods and biomarkers to study speech disorders in children
