STUDY TITLE: A DIGITAL THERAPEUTIC
PLATFORM FOR SWALLOWING AND
DROOLING PROBLEMS IN PARKINSON'S
(PHASE III)

RESEARCH OPPORTUNITY FOR INDIVIDUALS WITH PARKINSON'S DISEASE

WHO: Adults with Parkinson's disease.

WHY: Dr. Bonnie Martin-Harris (PI) and her study team at Northwestern University are studying swallowing and drooling in patients with Parkinson's disease.

WHAT: This study will require:

- 2 in-person visits (1-2 hours each with breaks as needed)
- 3 weekly remote check-ins (15 mins each)
- You will wear a sensor for a minimum of 4 hours per day over a 3-week period.
